Development & Production
Special Equipment

We develop and produce equipment necessary for public security, such as warning lights and multi-cam integrated searchlights. We develop technology that excels in convenience and safety according to the user's special situation.

Multi-cam

Warning Light

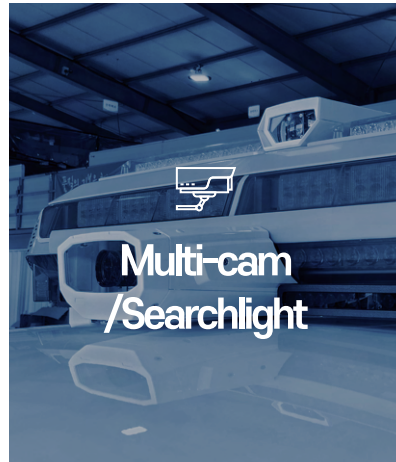

Safety Partition

Equipment Boxes

SPECIAL EQUIPMENT

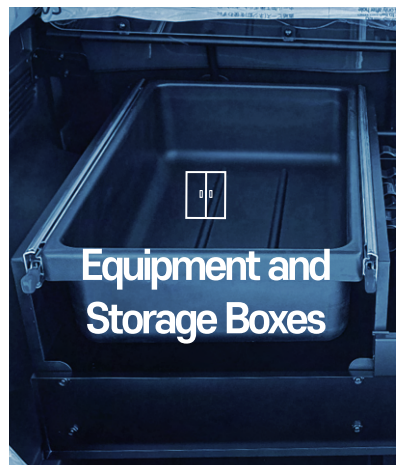

All-in-One Multi-cam /Searchlight

This is an integrated warning light that includes multi-cam and searchlight, so all functions can be operated at once, making it convenient for the user.

Multi-cam/Searchlight

This is equipped with a multi-cam with license plate recognition features and a searchlight that is easy to use at night, enabling real-time wanted vehicle alarms even during the day or night and when driving at high speeds.

The searchlight has a very long beam range, enabling observation from a long distance when used at night.

Safety Partition

The driver's safety is ensured by installing a partition between the driver's seat and the back seat. It is possible to prevent suspects in the rear seat from escaping as well as to separate the space.

Equipment and Storage Boxes

Various equipment and items can be manufactured according to their purpose and be loaded and stored safely and conveniently.

SAFETY EQUIPMENT

Handling the entire process within the company, from planning to design, development, and testing

Development & Production

Safety Equipment

We develop personal safety equipment that can be used in everyday life and during various leisure activities. Ensures user safety in urgent situations or emergencies.
